

News Release

Reuse & Recycle Responsibly with Nu2U

3 March 2011, Olds, Alberta – Located in the heart of Uptowne Olds, Nu2U is a socially responsible sustainable living project proudly hosted by the Town of Olds. It is a community based enterprise, dependent on avid volunteers and generous donors. The project emphasizes the value of community; neighbors helping neighbors.

Nu2U is part of the social service network in Olds and immediate surrounding area. The thrift store provides members of the community with a depot where gently used items can be donated, and those items generate proceeds in support of community initiatives and individuals in need.

When we reuse and recycle responsibly, people and the planet benefit. Nu2U provides low prices on essential items to ensure each member of the community can acquire the basics when it comes to housewares, small appliances, linens and furniture.

Cost effective repairs are done on items that are donated, and recycling is a major part of the operation. Nu2U is committed to keeping as much out of the landfills as possible by responsibly recycling electronics, metals, plastics, glass, cardboard and paper.

Shopping in a thrift store is like going on a treasure hunt, with all the benefits of used furniture, entertainment, crafts, collectibles and antiques, not to mention the thrill of finding a great “treasure.”

The heart of Nu2U is the people.... working, giving, helping, encouraging, having fun together to build a better, stronger, sustainable community.
