

The following maps are figures drawn from the preliminary Noise Impact Assessment provided to the Town. Figure 4A shows the sound pressure levels (SPL) from only the facility itself after proposed noise control measures. Figure 4B shows the cumulative sound pressure levels including the facility and ambient volumes from other uses and roadways, also showing levels after noise control measures are applied.

Figure 4A: Noise Contour Map – After Noise Control – Facility SPL – Nighttime

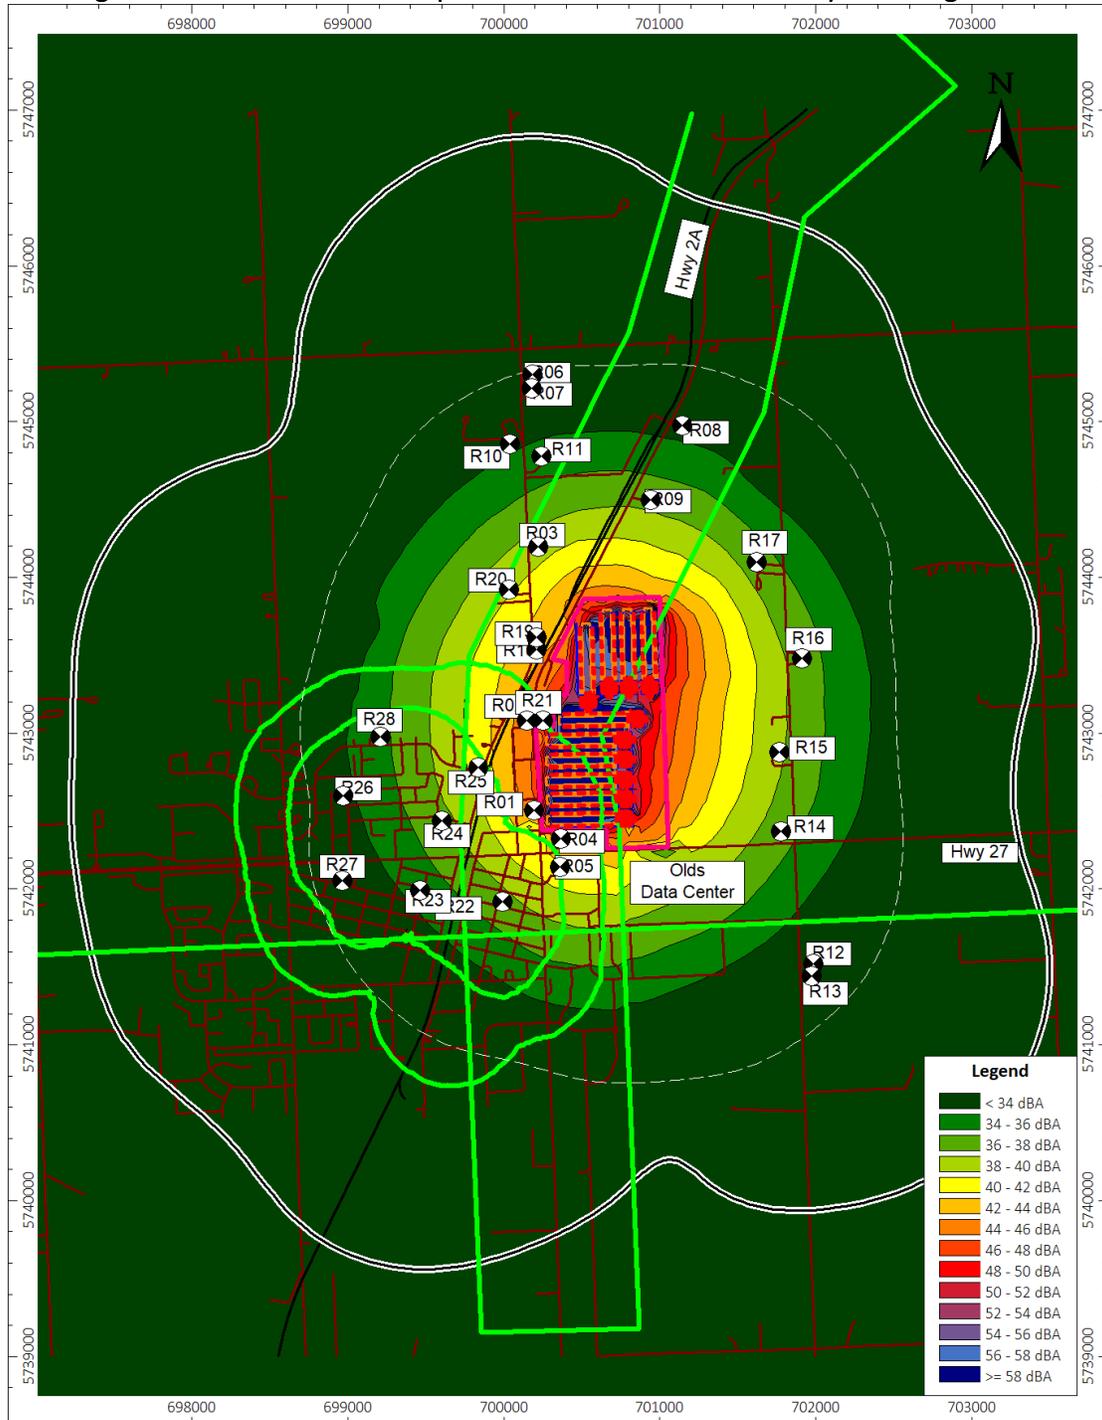

Figure 4B: Noise Contour Map – After Noise Control – Cumulative SPL – Nighttime
