

Introduction

A Key Performance Indicator (KPI) is a metric used to evaluate factors that are crucial to the success of an organization. The importance of each KPI may change with time depending on the goals and strategic plans of the organization.

When reviewing KPIs, it is important to not only compare to past performance and desired goals, but to consider industry standards and benchmarks.

The following information has been provided in order to provide you some insight into some important KPIs for your organization.

It is important to review the underlying information of your municipality in order to determine cause and create desired change.

The underlying data for this report was taken from the financial data publicly available found on the Alberta Municipal Affairs website.

SUSTAINABILITY INDICATORS

Assets to Liabilities

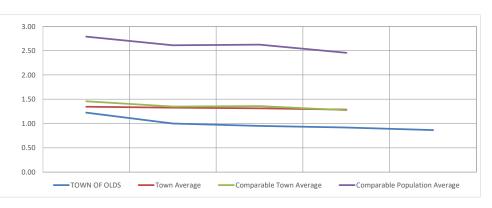

This indicator illustrates the extent a government finances its operations by issuing debt. A ratio higher than one indicates that a government has accumulated surplus and has assets greater than debt. A ratio of less than one indicates that debt is greater than assets and the government has been financing its operations by issuing debt.

| Total assets | 104,764,099 | 113,228,581 | 116,545,488 | 130,610,393 | 134,421,885 |

Financial assets to liabilities

This indicator illustrates the ratio of a government's financial assets to its liabilities. A result lower than one indicates a net debt position and future revenues will be required to pay for past transactions. A result higher than one indicates net financial assets and financial resources are on hand that can finance future operations. A trend showing increases in net debt or reductions in net financial assets may not be sustainable.

Current Ratio

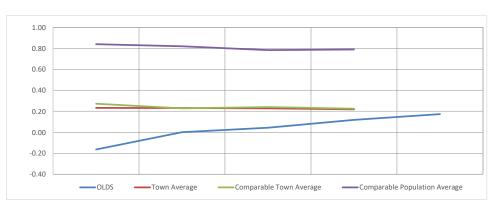

The ratio of current assets (cash, temporary investments, accounts receivable) to current liabilities (accounts payable, temporary borrowings, current repayment obligations on long-term borrowings). This ratio is an indication of the governments ability to meet short term obligations.

| Current assets | 20,427,738 | 24,980,711 | 25,029,520 | 35,193,239 | 33,138,243 |

Net debt to annual revenue

Net debt provides a measure of the future revenue required to pay for past transactions. A ratio that is increasing would indicate that more time to eliminate net debt will be necessary.

Operating expenses to taxable assessment

This indicator provides the trend of government spending over time in relation to the growth in the economy. A trend that shows total expense is growing at a faster rate than the growth in the economy may not be sustainable.

| Operating expenses | 23,224,581 | 25,036,467 | 25,417,905 | 25,008,000 | 25,370,668 |

FLEXIBILITY INDICATORS

Public debt charges to revenues

This indicator measures public debt charges as a percentage of revenues. It illustrates the extent to which past borrowing decisions present a constraint on the ability to meet financial and service commitments in the current period. Specifically, the more a government uses revenues to fund debt servicing, the less will be available for program spending.

| Debt servicing | 2,121,901 | 1,420,305 | 1,544,730 | 2,221,833 | 2,336,138 |

Debt to Revenue Percentage

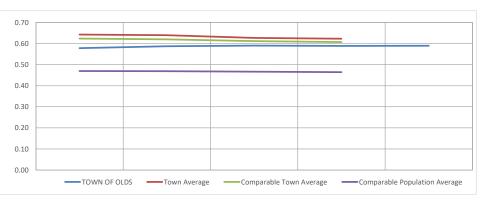

The total amount of municipal borrowings, including long term capital leases, as a percentage of total municipal revenues. This indicator demonstrates the growth in revenue compared to changes in debt. An increasing trend would indicate the municipality is increasing its debt load faster than its revenue is growing, which may not be sustainable.

Net book value to cost of tangible capital assets

This indicator is important because it reports the extent that the estimated useful lives of tangible capital assets are available to provide its services. If a government's scale, scope and level of services remain unchanged or grow, its asset base could eventually impair flexibility because of the impending future costs of capital asset repair or replacement.

| Net book value | 79,392,145 | 85,852,942 | 91,224,540 | 95,297,594 | 101,143,007 |

Infrastructure Investment

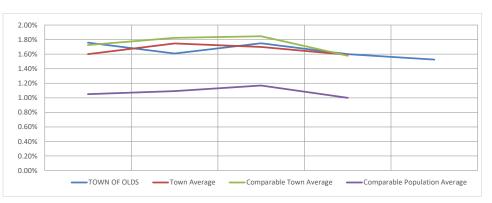

The total cost of annual additions (through purchases or construction) to tangible capital assets (vehicles, equipment, buildings, roads, utility infrastructure, land) relative to the annual amortization (depreciation) on all tangible capital assets - measured as a five-year average.

Own source revenues to taxable assessment

This indicator is important because it shows the ratio of a local government's own source revenues to its tax base. A change in the size of a local government's taxable assessment or a change in the rate of growth in assessment in relation to changes in own source revenues could influence flexibility.

| Own source revenues (net of government transfers) | 24,910,645 | 22,835,093 | 25,212,453 | 23,470,657 | 23,140,199 |

VULNERABILITY INDICATORS

Government transfers to total revenues

The purpose of this ratio is to show the proportion of revenues that provincial or local governments receive from other governments. This indicator offers a perspective on the degree of vulnerability a government faces as a result of its dependence on another level of government for revenues.

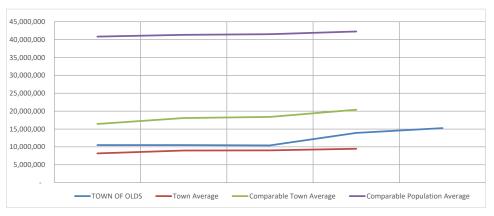

| Government transfers (including capital) | 3,530,291 | 3,943,374 | 4,439,517 | 3,542,028 | 6,204,162 |

OTHER INDICATORS

Accumulated surplus available for future use

Accumulated surplus, to the extent it has not been invested in Tangible Capital Assets, represents overall surplus that is available for future use. This consists of unrestricted surplus and reserves and shows trends in spending vs. saving. This indicator only shows total surplus; the overall size of the municipality is not taken into account.
