Water Conservation: A Community Commitment

During summer 2023, several water basins in our province reached critical drought conditions due to low rainfall and high temperatures. The Government of Alberta is observing the situation through a network of water and snowpack monitoring stations and is preparing for a similar or worse drought in 2024.

Alberta's government is working closely with communities like Olds to support conservation, water management and to prepare for current and future water shortages.

The Town of Olds is anticipating direction from the provincial government and will support these water conservation efforts for our community and for those downstream from us! We will keep our residents informed and updated as we learn more.
